

Registered Education Savings Plans (RESPs)

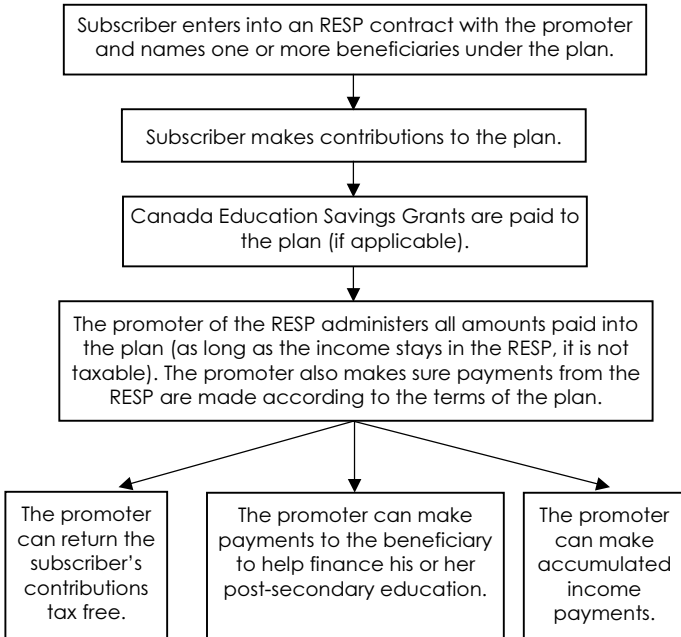

What is RESP?

An RESP is a contract between an individual (the **subscriber**) and a person or organization (the **promoter**). The subscriber (or a person acting for the subscriber) makes contributions to the RESP, which earn income. The subscriber names one or more beneficiaries and agrees to make contributions for them. We register the contract.

The promoter usually pays the contributions to the beneficiaries. Income earned on the contributions is paid to the beneficiaries in the form of educational assistance payments (EAPs). Beneficiaries include the EAPs, but not the contributions, in their income for the year in which they receive them from the RESP.

Subscribers cannot deduct their contributions from their income on their return. If not paid out to the beneficiary, the contributions are usually paid by the promoter to the subscriber at the end of the contract. Subscribers do not usually include the contributions in their income when they get them back.

The diagram below gives an overview of how an RESP generally works.

Who can be a subscriber?

There are no restrictions on the individual who can be the original subscriber under an RESP. You and your spouse or common-law partner, as defined in our guides, can be joint subscribers under an RESP.

For RESPs entered into after 1997, if you are not the original subscriber, you can only become a subscriber in the following situations:

- You are a spouse or common-law partner, or former spouse or common-law partner, of a subscriber and you get the subscriber's rights under the RESP as a result of a court order or a written agreement for dividing property after a breakdown of the relationship; or
- The RESP allows you to continue making contributions to the plan after the death of a subscriber.

The subscriber's estate can also become the subscriber after the subscriber's death.

All subscribers under an RESP have to provide their social insurance number and those of all beneficiaries to the promoter before we can register the plan.

Who can become a beneficiary?

Except for family plans, there are generally no restrictions on who can be a beneficiary.

Family plans are the only plans that allow the subscriber to name more than one beneficiary. Each beneficiary must be related by a blood relationship or adoption to each living subscriber or any deceased original subscriber.

For family plans entered into after 1998, each beneficiary must be less than 21 years of age at the time he or she is named as a beneficiary. When one family plan is transferred to another, a beneficiary who is 21 years of age or older can still be named a beneficiary to the new plan.

RESP contributions

You cannot deduct RESP contributions from your income on your return. In addition, you cannot deduct the interest you paid on money you borrowed to contribute to an RESP.

More Ways to Serve You!
Pour vous servir encore mieux !

You can contribute to family plans entered into **after** 1998 only for beneficiaries who are under 21 years of age at the time of the contribution. However, transfers can be made from another family plan even if one or more beneficiary is 21 years of age or older at the time of the transfer.

Note

The same age restrictions apply to family plans entered into in 1998, except that a contribution can only be made by transfer from another RESP or after such a transfer, if a contribution had already been made for the beneficiary before the transfer.

Canada Education Savings Grant – For 1998 and later years, the Minister of Human Resources Development Canada will pay a 20% Canada Education Savings Grant (CESG) on the first \$2,000 of annual contributions made to all eligible RESPs of a qualifying beneficiary. Beneficiaries qualify for a grant on the contributions made on their behalf before the end of the calendar year in which they turn 17 years of age. However, special conditions must be met by the end of the calendar year in which the beneficiary turns 15. All CESGs are paid to the trustee of the RESP. The grants and accumulated earnings will be part of the educational assistance payments paid out of the plan to the beneficiary. The maximum CESG amount that a beneficiary can receive is \$7,200. For more information on the CESG Program, call **1-888-276-3624**.

RESP contribution limits

There is an annual limit and a lifetime limit on the amounts that can be contributed to RESPs. For each beneficiary, the annual limit for contributions to all RESPs is \$4,000 and the lifetime limit is \$42,000.

We do not include payments made to an RESP under the CESG Program when we determine if the annual and lifetime limits have been exceeded.

Tax on overcontributions

An overcontribution occurs at the end of a month when the total of all contributions made by all subscribers to all RESPs for a beneficiary is more than the annual or lifetime limit for that beneficiary. We do not include payments made to an RESP under the CESG Program when determining whether a beneficiary has an overcontribution.

You and all other subscribers for that beneficiary are liable to pay a 1%-per-month tax on your share of overcontributions that are not withdrawn at the end of the month. The tax is payable within 90 days of the end of the year in which there is an overcontribution. An overcontribution exists until it is withdrawn.

You have to inform us of your share of overcontributions to all RESPs for a beneficiary. To calculate the amount of tax you have to pay on your share of overcontributions for a year, complete Form T1E-OVP, *Individual Income Tax Return for RESP Overcontributions for 1996 and Future Years*. For 1995 and earlier years, use Form T1E-OVP(93), *Individual Income Tax Return for Registered Education Savings Plans Over-Payments*. These forms are available from your tax services offices and tax centres, or by calling us at **1-800-959-2221**. Form T1E-OVP is also available on our Web site at www.cra.gc.ca.

You can reduce the amount subject to tax by withdrawing overcontributions. However, when we check whether the lifetime limit has been exceeded, we include these amounts as

contributions for the beneficiary even if they have been withdrawn.

Example

In January 2002, Hugh established an RESP for his son Allan and contributed \$1,500. At the same time, Allan's grandmother, Cathy, established another RESP for him and she contributed \$1,000. In July, Hugh contributed \$1,500 to Allan's RESP and Cathy contributed \$1,000. In December, Hugh withdrew \$400 to reduce his share of the overcontributions.

Hugh's share of the overcontributions for 2002	
Hugh's contributions to an RESP for Allan	\$ 3,000
Cathy's contributions to an RESP for Allan.....	+ 2,000
Total contributions to an RESP for Allan	= \$ 5,000
Maximum allowable for 2002	- 4,000
Overcontributions.....	= \$ 1,000
Hugh's share of the overcontributions ($\$3,000 \div \$5,000$) \times \$1,000	\$ 600
Hugh's tax payable for 2002	
Tax is calculated for the months the overcontributions stay in the RESP.	
For July to November: $\$600 \times 1\% \times 5$ months	\$ 30
For December: $(\$600 - \$400) = \$200 \times 1\%$	+ 2
Hugh's tax payable on the overcontributions (the tax has to be paid by March 31, 2003)	= \$ 32

Cathy calculates her share of the overcontributions and tax payable in the same way as Hugh, based on her total of \$2,000 in contributions.

Unless Hugh and Cathy withdraw all of their overcontributions, they will continue to have to pay the 1%-per-month tax on the part of their share that stays in the plan. When determining whether Allan's lifetime contribution limit has been exceeded in future years, Hugh and Cathy have to include the withdrawals as part of the total contributions they made for Allan.

Special rules

Changing the beneficiary – Generally, when you replace one RESP beneficiary with a new beneficiary, we treat the contributions for the former beneficiary as if they had been made for the new beneficiary on the date they were made originally. If the new beneficiary already has an RESP, this may create an overcontribution.

This rule **does not** apply in the following situations:

- The new beneficiary is a brother or sister of the former beneficiary and is under 21 years of age.
- Both beneficiaries are connected by a blood relationship or adoption to an original subscriber under the RESP, and both are under 21 years of age.

In these situations, we do not include the contributions made for the former beneficiary when we determine whether the annual and lifetime contribution limits have been exceeded for the new beneficiary.

Transferring RESP property to another RESP – Most transfers from one RESP to another RESP will have no tax implications. This is the case when the transferring RESP and the receiving RESP have the same beneficiary. There are also no tax implications when a beneficiary under the transferring RESP has a brother or sister (under 21 years of age before the transfer is made) who is a beneficiary under the receiving RESP.

In any other case, transfers can result in an overcontribution. This is because the RESP contribution history for each beneficiary under the transferring RESP is assumed by each beneficiary under the receiving RESP. We treat each contribution as if it had been made into the receiving RESP. In addition, we treat each subscriber under the transferring RESP as a subscriber under the receiving RESP. This means that he or she is liable for any tax on overcontributions.

Payments from an RESP

The promoter can make four different types of payments:

- payment to a designated educational institution in Canada (for more information, refer to Information Circular 93-3, *Registered Education Savings Plans*);
- payment of contributions to the subscriber or beneficiary;
- educational assistance payments; and
- accumulated income payments.

Payment of contributions to the subscriber or the beneficiary

Subject to the terms and conditions of the RESP, the promoter can return your contributions to you when the contract ends or at any time before. Promoters do not issue T4A slips to report these payments. Do not include these payments as income on your return.

The promoter can also pay the contributions to the beneficiary with no tax implications. This is in addition to any educational assistance payments, as described in the next section.

Educational assistance payments (EAPs)

An EAP is the payment of an RESP's income and Canada Education Savings Grant amounts to a beneficiary (the student) to help finance the cost of post-secondary education. The promoter reports EAPs in box 42 on a T4A slip and sends a copy to the student. The student includes the EAPs as income on his or her return for the year the student receives them.

The promoter can pay EAPs if **one** of the following situations applies:

- The student is enrolled as a full-time student in a qualifying educational program at a post-secondary educational institution (this includes students attending an institution and those enrolled in distance education courses, such as correspondence courses).
- The student cannot reasonably be expected to be enrolled as a full-time student because of a mental or physical impairment, as certified in writing by a medical doctor, an optometrist, a speech-language pathologist, an audiologist, an occupational therapist, or a psychologist.

A **qualifying educational program** is an educational program that requires students to spend 10 hours or more per week on courses or work in the program, and that lasts three consecutive weeks or more. If the program is at a university, college, or other designated educational institution in Canada, it has to be at the post-secondary school level. The program will **not** qualify if it is taken at a time during which the student is receiving employment income (excluding part-time or temporary employment to finance studies) and the program is taken in connection with, or as part of the student's employment.

A **post-secondary educational institution** includes:

- a university, college, or other designated educational institution in Canada;
- an educational institution in Canada certified by the Minister of Human Resources Development Canada as offering non-credit courses that develop or improve skills in an occupation; and
- a university, college, or other educational institution outside Canada that has courses at the post-secondary school level, as long as the student is enrolled in a course that lasts at least 13 consecutive weeks.

Limit on EAPs – For RESPs entered into after 1998, the maximum amount of EAPs that can be made to a student as soon as he or she qualifies to receive an EAP is \$5,000. After the student has completed 13 consecutive weeks in the qualifying educational program, there is no limit on the amount of EAPs that can be paid if the student continues to qualify to receive them. If there is a 12-month period in which the student is not enrolled in a qualifying educational program for 13 consecutive weeks, the \$5,000 maximum applies again.

The Minister of Human Resources Development Canada may, on a case-by-case basis, approve an EAP amount of more than the above limit if the cost of tuition **plus** related expenses for a particular program is substantially higher than the average. For information on how to request an approval of an EAP of more than \$5,000, promoters should call **1-888-276-3624**.

Accumulated income payments (AIPs)

An AIP is an amount, usually paid to the subscriber, of the income earned from an RESP. It does not include educational assistance payments, payments to a designated educational institution in Canada, transfers to another RESP, or repayments under the Canada Education Savings Grant. AIPs cannot be made as a single joint payment to separate subscribers.

An RESP may allow for AIPs when **all** the following conditions are met:

- The recipient is a resident of Canada.
- The recipient is a subscriber of the RESP, unless a subscriber of the RESP has died.
- Each beneficiary under the RESP for whom the subscriber made contributions has died, or has reached 21 years of age and is not currently eligible to receive educational assistance payments.

- The RESP has existed for at least 10 years. If all the beneficiaries are deceased, the 10-year existence requirement still applies unless each beneficiary was a subscriber, was related to the subscriber, or was the nephew, niece, great-nephew, or great-niece of the subscriber.

Note

We may waive the last two conditions if it is reasonable to expect that a beneficiary under the plan will not be able to pursue post-secondary education because he or she suffers from a severe and prolonged mental impairment. Such requests have to be made by the RESP promoter in writing to the following address:

Registered Plans Directorate
 Canada Customs and Revenue Agency
 45 Sacré-Cœur Boulevard, 3rd floor
 Hull QC K1A 0L5

An RESP must be terminated by the end of February of the year after the year in which the first AIP is paid.

How AIPs are taxed

Promoters report AIPs in box 40 of T4A slips and send a copy to the recipient of the AIP. You have to include the AIP as income on your return for the year you receive it. An AIP is subject to two different taxes: the regular income tax and an additional 20% tax (12% for residents of Quebec).

Regular tax – This is the tax you calculate when you complete your return. It is based on your total taxable income.

Additional tax – You calculate this tax separately, using Form T1172, *Additional Tax on Accumulated Income Payments From RESPs*. Include a completed copy of Form T1172 with your return for the year you receive the AIP. You have to pay the additional tax by the balance due date for your regular tax, usually April 30 of the year that follows the year in which you received the AIP.

Reducing the amount of AIPs subject to tax – You can reduce the amount of AIPs subject to tax if you are the subscriber or the spouse or common-law partner of a deceased original subscriber (if there is no other subscriber) and you meet **both** of the following conditions:

- You contribute an amount not more than the amount of the AIPs (to a lifetime maximum of \$50,000 worth of AIPs) to your registered retirement savings plan (RRSP), or to your spouse’s or common-law partner’s RRSP, in the year the AIPs are received or in the first 60 days of the following year.
- Your RRSP deduction limit allows you to deduct the amount contributed to your or your spouse’s or common-law partner’s RRSP on line 208 of your return. (Claim the deduction for the year in which any payments are made.)

You cannot reduce the AIPs subject to tax if you became a subscriber because of the death of the original subscriber.

By claiming an RRSP deduction, you reduce your taxable income, which reduces your regular tax. The RRSP deduction also reduces the amount of additional tax payable by reducing the amount of

AIPs subject to tax (see Form T1172). If the amount of the RRSP deduction equals the amount of the AIPs, the taxes on the AIPs are zero.

Promoters usually have to withhold regular and additional taxes on AIPs. However, they do not have to withhold tax if **both** of the following apply:

- The AIPs are transferred directly to your or your spouse’s or common-law partner’s RRSP.
- Your RRSP deduction limit allows you to deduct the contribution in the year it is made.

Complete Form T1171, *Tax Withholding Waiver on Accumulated Income Payments From RESPs*, to ask the promoter to transfer the payment directly to your or your spouse’s or common-law partner’s RRSP without withholding tax.

Example

The RESP under which Mary is an original subscriber allows AIPs. In July 2002, Mary received an AIP of \$16,000. She completed Form T1171 to have \$14,000 transferred directly by the promoter to her RRSP. Mary’s RRSP deduction limit for 2002 is \$14,000. She did not make any other RRSP contributions during the year. She was a resident of Manitoba on December 31.

Mary completes Form T1172 to determine the amount of additional tax she has to pay for 2002 as follows:

AIP for 2002.....	\$	16,000
Amount Mary deducts for 2002 for RRSP contributions from an AIP (this amount cannot be more than \$50,000 for all years).....	-	14,000
Amount subject to the additional tax.....	= \$	2,000
Rate.....	×	20%
Additional tax payable.....	= \$	400

Mary reports the AIP of \$16,000 on line 130 and the additional tax on line 418 of her 2002 return. She also claims the RRSP deduction of \$14,000 on line 208 and attaches a copy of Form T1172 to her return.

Note

If Mary had received the amount in January 2002 and transferred it to an RRSP, provided her RRSP deduction limit was sufficient, she could have decided to claim all or part of the deduction for the 2001 tax year. This would have been possible because the amount would have been transferred in the first 60 days of 2002. However, had she done so, she would not have been allowed to reduce the additional tax because the amount transferred to her RRSP has to be deducted on the tax return for the year in which the amount is received. That is, on her 2002 tax return, Mary would determine the additional tax payable based on the full \$16,000 of the AIP. The additional tax is \$3,200 (\$16,000 × 20%).

Think recycling!
